

SHUNGITE EXCELLIUM

ENERGY BOOSTER D'ÉNERGIE

EXCELLIUM SPHERES

According to many scientists, the origin of Shungite comes from a meteorite composed of **C60** molecules which fell approximately 2.4 billion years ago, north of St-Petersburg, in Russia. This meteorite is believed to have originated from the explosion of a sun, that's why many people say it is sun in a can. The fusion of this meteorite created an amalgam of all kinds of metals which do not affect the efficiency of the **C60** molecule. As a result, traces of these different amalgams may appear and in some cases the color of the spheres and pyramids may vary.

There may be veins, small cracks or small pockets. The spheres being made by craftsmen one at a time, therefore we cannot ensure a perfect precision of the form, the size, nor its visual homogeneity. What is important with this Stone of Life is its effectiveness which is not affected in any way. In Russia there is a saying that goes like this; if you are looking for effectiveness with this stone, you are at the right place, but if you are looking for esthetic go to your favorite jewel store.

All the bases of the Excellium Spheres are made with the same quality of Excellium Shungite, thus increasing its power.

According to research from IBM, BELL and AT&T the **C60** molecules rotate at 20 billion revolutions per second (according to the analysis carried out independently by Costantino Yannoni of the IBM group and Robert Tycko of AT&T and Bell Labs) which brings it to influence all the waves and neutralize all the free electrons around it while keeping a neutral energy. This stone does not absorb any energy either negative or positive, it is at point zero which leads many scientists to believe that this is why it is so powerful.

Spheres have a harmonizing power on our energetic body because this perfect form is in resonance with our vital field. Emanating a pleasant waveform that connects us more to life in all its forms, physical and spiritual. Since 2013 thousands of people have had phenomenal experiences with Anti-Aging Alliance Inc.'s Excellium Spheres.

We strongly suggest that users put their hands on the Spheres for a minimum of 15 to 20 minutes several times a day depending on physical or spiritual need. (See the testimonials on our WEB site). Many put their hands on it while watching a movie on television. Some put their feet on the base at the same time and their hands on the sphere, thus increasing the anchoring and the circulation of energy. It has been recognized for thousands of years that it is with the palms of the hands that humans best transmit energy. Several specialists in Russia say that it is also with the palm of the hands that the energy is mainly captured. Some Russian practitioners claim that a succession of hand-laying sessions of more than half an hour at a time on a 20cm Excellium Sphere would have an impact on correcting DNA. Having a large glass of water before each session will give you better results.

With the results we have observed, we invite you to do the same. Please note that the energy from **C60** molecules never decreases during use. Russians claim that this practice with the palms of the hands will allow your body to capture this neutral energy which will regenerate the cells of your body according to its needs.

The best results have been obtained with the Excellium Spheres of 15cm and 20cm. By taking a large glass of water before placing your hands on the Sphere will greatly increase the efficiency of these special sessions of energy and vitality.

For people who have obtained Excellium Sphere(s) through the Harmful Wave Protection Program, have all the occupants of your home benefit from these wonderful Excellium Shungite Spheres by encouraging them to put their hands on them.

By placing your hands on the Sphere, it can happen that the skin becomes black. Several therapists in Russia have concluded that this is caused by the high acidity level in this particular area of the body. By its nature, Excellium Shungite always seeks to neutralize what is unbalanced in everything, including acidity. If it is necessary, your body will use Shungite to strengthen itself as long as it needs it. Normally, the blackening caused by acidity should stop within 2 to 15 days.

The more you use your Sphere, the more it will become dull. The shiny side you saw when purchased was due to the polishing finish of the product. Shungite in its natural state is matt.

It is recognized by many scientists that the most perfect form in the universe is the Sphere. Its shape encourages calmness and harmony due to the fact that it corrects the torsion field to the right, it is widely used to create shields to protect against the harmfulness of electromagnetic and pulsed waves whether it is to protect hypersensitive people or simply as a preventive measure. **(To see testimonials, visit the CPON-INTL.COM web site)**
